DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it should include the anticipation language that is critical to the invention. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3, 4, 6-8, 15, 16, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by GB-2316986 (GB'986).

Re: claims 3, 6-8, 15, 6, 18, and 19. GB'986 shows in figure 1 a method capable of controlling the pressure in an electrohydraulic braking system having a pump 14, an accumulator 28 and a valve arrangement 22,24 controlling pressure at a vehicle brake, comprising the steps of: sensing an accumulator pressure, comparing the sensed accumulator pressure to a preset pressure set point as disclosed in the last paragraph on pg. 4, controlling at least one valve in the valve arrangement 22,24 to allow fluid to flow through the valve if the sensed accumulator pressure at least equals the preset pressure set point, determining that the pump is running while accumulator pressure is above a pump shut-off

Art Unit: 3683

pressure and providing a signal to bias the at least one valve to rapidly open to a point in excess of that which would be demanded based on accumulator pressure alone in anticipation of further pressure rise due to the pump failing to shut off as disclosed in the last paragraph on pg. 5 – the first paragraph on pg. 6.

Re: claim 4. See the release valve 24 in figure 1.

Re: claim 18. See the apply valve 22 in figure 1.

Response to Arguments

4. Applicant's arguments, see pg. 6 of the Remarks, filed 7/3/06, with respect to the rejection(s) of claim(s) 3 and 18 under 35 USC 103 using the Silhouette and Shafer references have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of GB'986.
